

Installation Guide: Maxibar X Mini LED Lightbar Magnetic Mount

Magnetic mounting

For information on the control and operation of the Maxibar X (MX.2314) then please refer to the separate documentation provided. You can find copies of it on our web site at www.onustechnologies.co.uk/technical or by calling 08712 002 198.

This magnetic mounting kit is not designed for other Onus or other manufacturer products so no technical support or warranty can be provided in this instance.

Assembling the magnetic mounting kit

The lightbar will come supplied with the magnetic mounting kit fitted, however should you be replacing a damaged or missing kit or component then please refer to the exploded view of the components on the right.

Converting an existing lightbar

If converting a lightbar from a previous generation or to convert a lightbar from a permanent mount to a magnetic mount then please assemble the kit using the exploded view of the components on the right.

Obtaining spare parts

For all enquiries regarding spare parts, please contact Onus Technologies in the first instance on 08712 002 198 or via our web site.

WARNING

Ensure that only suitably trained personnel attempt to install this device or devices. Failure to install the device properly could result in damage to the vehicle, injury or even death.

WARNING: MAGNETIC MOUNTING

Do not use the magnetic mounting in icy conditions and ensure mounting surface is dry, unpolished and clean before use. Onus are not liable for any damage or detachment of the lightbar when used with a magnetic mounting.

SPEED LIMIT: 70MPH

This lightbar is only designed to be used at speeds up to and including 70mph (UK motorway speed). Use of magnetic mountings is at your own risk whatever the speed.

Magnetic mounting kit components (dual foot)
